

## TRANSLATE PLUS DRUPAL® CONNECTOR

Drupal® is a registered trademark of Dries Buytaert

Drupal® is a collective open-source content management system (CMS) built on the ideologies of collaboration and innovation. The CMS can be extended with the choice of thousands of add-ons, plus their countless theme options let you customise your content's presentation. Drupal is used and trusted to create many of the websites you see and use every day.

Being a software independent company, we have the tractability and in-house practical skills to offer full integration to all Drupal users when it comes to their translation requests. The translate plus Drupal connector enables users to simply and efficiently get content translated. There's no copy-and-pasting, or need to manually import/export files.

The connector module works in-sync with Drupal's in-built "TMGMT" (Translation Management) functionality. This means that installing the translate plus connector is as simple as configuring a Drupal "Translation Management Translator".

### KEY FACTS

- ✓ Easy to install
- ✓ Significant development and administration cost savings
- ✓ End-to-end encryption & intuitive interface
- ✓ No need to involve developers
- ✓ Leverages Drupal's existing TMGMT functionality

### How does the connector work?

To send a page for translation simply use Drupal's in-built functionality – for example, clicking the Translate tab against a specific page:

#### Our services

View Edit **Translate** Devel

translate plus offers high-quality language services using our cutting-edge **technology solutions** to improve efficiency and reduce costs.

- Document & text services
- Multimedia & audiovisual services

Choose either "Request translation" to send content for translation immediately, or click "Add to cart" to build up a translation cart of multiple pages and articles, which can be sent for translation together:

#### Translations of *Our services*

Add to cart There are 0 items in the translation cart.

<input checked="" type="checkbox"/>	LANGUAGE	SOURCE LANGUAGE	TRANSLATION	STATUS
<input type="checkbox"/>	English	(original content)	<a href="#">Our services</a>	Published
<input checked="" type="checkbox"/>	German	n/a	n/a	Not translated
<input checked="" type="checkbox"/>	Chinese, Simplified	n/a	n/a	Not translated

Request translation

You can specify a deadline and add comments via the connector, your job requests are then submitted effortlessly to translate plus, with full encryption for complete peace of mind. Once the translation has been finalised it can be published on-demand or automatically via scheduled "cron" tasks.

#### Due date

2017-01-06 14:00

3 days suggested deadline, based on one day per 1000 words plus two days

#### Purchase order number

PO12345

An optional purchase order (PO) number which for some customers is an esse

#### Comments

This content will appear on the top-level of the site.

With the Drupal connector you can see a summary of which items are currently being translated, which have already been translated, and which haven't yet been translated.

State:  From:  To:  Translator:

Node title:  Source Language:  Node type:  Target language:

OPERATIONS

TITLE (IN SOURCE LANGUAGE)	NODE TYPE	ENGLISH	GERMAN	CHINESE, SIMPLIFIED
<input type="checkbox"/> Our services	Basic page	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> About	Paragraphs page	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Request translations directly within Drupal

The connector also integrates seamlessly and securely with our translation management system, i plus®, where you'll gain the benefits of translation memory, reporting functionality, review plus (with integrated live web preview), and all the other advantages of working with translate plus.

Paramount to the translate plus Drupal connector's success is that it involves no development expertise or resources. The connector can be easily installed via Drupal's Regional and language configuration page and once installed, you're ready to send and receive translations directly through Drupal.

## As a Drupal customer, what are the benefits?

- ✓ Our translate plus Drupal connector boasts significant development and administration cost savings
- ✓ With the connector all users will stay in their familiar Drupal environment
- ✓ The hazard of manual copy-and-paste errors is eliminated with the software
- ✓ Users can very easily keep track of all translation statuses – 24/7
- ✓ Through integrating with translate plus you are able to use our review tool review plus. Any changes are automatically updated in your translation memory, helping reduce costs and consistently improve quality
- ✓ Within review plus you are able to see a live view of how your new content will appear on your website, allowing you to

make sure that the overall look and feel is perfect before approving any translation

- ✓ Our system protects embedded HTML codes during translation, making it much clearer for the linguist to see which content to translate and which to leave, greatly improving the quality and increasing the speed of the job
- ✓ All deadlines will be met, including any jobs we receive over the weekend. We can automate our system so that translation requests received over the weekend will still be passed onto the relevant linguist immediately and stored within your i plus job folder for review, translation memory update and cost analysis instantly.
